AURORA

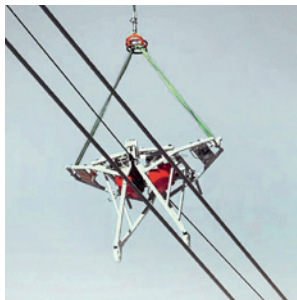

REFLECTIVE AIRCRAFT WARNING MARKER
FOR BETTER VISIBILITY

VISIBILITY IS SAFETY

AURORA CONVINCES

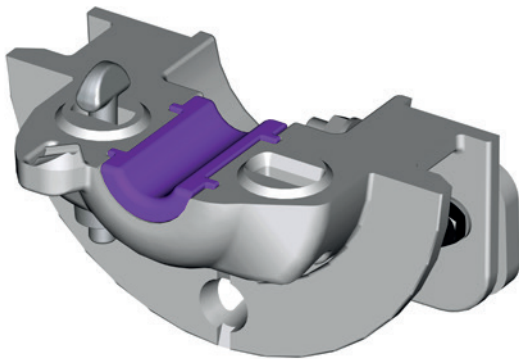

VISIBILITY IS SAFETY

With Aurora, Mosdorfer presents a completely new type of aircraft warning marker.

Specially shaped and coming with more than 50 % reflective surface, it noticeably enhances the visibility to any approaching aircraft, especially at dawn and night. Easy to handle clamps ensure fast and safe installation, both from cable car or with the aid of a remote-controlled robot device transported by helicopter.

The advantages at a glance

- More than 50 % reflective surface for better visibility
- Made of extra durable glass fibre reinforced plastic to withstand even harsh environmental conditions
- Gelcoat surface for protection from environmental impacts (e. g. UV-radiation)
- The specially designed clamp can be mounted manually as well as by means of a remote-controlled robot device
- The fast-lock pin is twisted to the end position and secures itself automatically against loosening
- Clamps with rubber inserts for maximum conductor protection
- Optimised for fast, easy and safe installation
- Individually packed in cardboard boxes for easy transport, storage and handling
- Extensively tested for your safety (vibration stress, temperature cycle, torque and slip load tests etc.)
